

## 6235 CMD-Manager in CDX

### Objective

You have an overview of the function for querying CMD reports (Conflict Mineral Declaration) within the CMD Manager. You know how to evaluate incoming CMD reports using the CMD-manager and accept them.

You know how to import Excel-based EICC/CFSI files and you can create your own CM-reports and manage them. Furthermore, you know the methods of service and the export mechanism of CMD reports outside the CMD Manager.

You know what a quality profile is and overlook how a quality report is generated and how to interpret violation categories. You know how to find smelters and are informed how to report them.
