

KL62 Getting to know CDX

Companies in all industries must comply with numerous legal requirements and document the individual materials of their products exactly – over the whole supply chain. For the automotive industry, the International Material Data System IMDS has established itself as the standard. For the other areas, the sister system CDX (Compliance Data Exchange) provides a convenient solution to meet compliance requirements.

Objective

You know the background, goals and structure of the Compliance Data Exchange System (CDX) and know how you can use it in your company. You will also learn where we can assist you.
