

6235 The CMD Manager in CDX

Objective

You have an overview of the function for requesting CMD (Conflict Mineral Declaration) reports within the CMD Manager. You know how to evaluate and accept incoming CMD reports using the CMD Manager.

You know how to import Excel-based EICC/CFSI files and how to create, deliver and manage your own CMD reports in the CMD Manager. You will also have an overview of the delivery procedure and the export mechanism for CMD reports outside the CMD Manager.

You know what a quality profile is and have an overview of how a quality report is generated and how violation categories are interpreted. Know how to locate smelters and how to report them.
