Material Compliance Reporting with the CDX System

The Compliance Data Exchange (CDX) system provided by DXC Technology facilitates a compliant and holistic material reporting process as well as the collection, maintenance and analysis of material data along your entire supply chain.

With the dedicated service module **Initial Consulting on CDX**, **imds professional** supports you in setting up your material reporting putting an emphasis on the CDX environment.

With our CDX services including consulting, implementation, information, and support of your company's responsible units, our experts will cater to your specific needs and requirements.

Service Module *Initial CDX Consulting*

Tailored to your corporate requirements and needs, **imds professional** advises you on a strategy, development stages and solution scenarios when implementing the CDX system. The consulting will be conducted as web meetings with our experts.

This service module includes 8 consulting hours, usually divided in 2 web meetings with 3 hours each.

Meeting 1 Professional Requirements

Objective: you understand your company's material compliance requirements. You know the range of functions of the CDX system and can map out its efficient use. You can estimate the resources required for implementing CDX in your company and in your supply chain. You are able to take decisions when it comes to using CDX in a way that is adapted to your work process and those involved in your company.

- What goals do you want to achieve with the deployment of CDX?
 - National and international legal regulations
 - Countries, markets
 - Exceptions and current developments in Material and Product Compliance: REACH, RoHS, China RoHS, Conflict Minerals, WEEE, Batteries and Packaging Ordinance, Proposition 65, HKC etc.
- What is your course of action for implementing CDX?
- Creating a framework: parties concerned, specifications for suppliers und purchase agreements, etc.
- Assigning roles and responsibilities
- Defining the processes for long-term use of CDX
 - Supplier Management, Data Validation, Reporting ...
- Implementation and communication strategy

Meeting 2 Technical Implementation

Objective: you understand the features and implications of CDX for material reporting in your company and at all levels of the supply chain. You can map out a compliant material management with CDX in detail.

- Customizing CDX:
 - Company data, Organizational Units
 - Assigning Key Users, Users, Contact Persons, Rights Management ...
- Example for Supplier Invitation for Registration
- Options for Personalized Supplier Message
- Getting to know Static Reminder Intervals
- Information logistics in the supply chain
- Data management based on routine functions of CDX and protection of your intellectual property
- Analysis and Reporting option in relation to material compliance
- Scope of services and training needs assessment
- Customized consulting by **imds professional** on further course of action

Legal Notice

For the provision of all services described, a valid CDX license is a necessary prerequisite. Our service is linked to the respective license package (<https://public.cdssystem.com/de/web/cdx/ordering>). Any transfer of the service to another license is excluded.

The registration of your suppliers depends to a large extent on their motivation or, if applicable, their contractual compliance to cooperate. Individual measures may be necessary, which **imds professional** offers as a separate service.

Our experts will be glad to assist you in planning, implementing, optimizing and supporting further compliance tasks with CDX. We will be happy to provide an individual, customized quote for services in the following areas:

- **Consulting**
 - Individual consulting on Compliance solutions and implementing CDX in your company
 - Support in setting up all CDX activities and functions within your company
 - Assistance in solving your current Material Reporting problems
- **Onboarding**
 - Supplier identification and registration
 - Supplier support
- **Service**
 - Supplier Management
 - Data Collection, Validation, Update and Migration
 - Reporting
- **Training (classroom and online training worldwide)**
 - Training of your personnel
 - Training of your suppliers
