

6125 - New IMDS Releases 13.1 and 13.2

The IMDS Release 13.1, planned for January 2022, provides new functions. Learn about the new options and functions to use the IMDS in a targeted and efficient way in your company. In addition, release 13.2 is planned for the second quarter of 2022 and the first changes have been determined.

Objective

You are familiar with all new functions and changes provided by IMDS Release 13.1. You know under which condition S2S keys in organizational units are deposited in the IMDS for the MDB transfer in SCIP and you know the extended SCIP attributes. You are aware of the changed alerts in IMDS, you can assess them and have an overview how recycling quotas are automatically calculated in Release 13.2. You can assess the impact of the release changes on your daily work and can use the new functions with confidence.

Content

IMDS Release 13.1

(January 26, 2022)

- ☐ Visibility and warning of recyclates exceeding the maximum value of 20%.
- ☐ Multiple S2S keys per organizational unit
