

6176 – Understand and apply the Supply Chain Due Diligence Act (LkSG)

The new LkSG law will soon be enacted by the German Federal Office for Economic Affairs and Export Control. Its prime focus is the protection of human rights in global supply chains. The introduction of the law is likely to pose new challenges in supply chain management and for your purchasing department. The law comes into force in January 2023 and obliges companies to comply with due diligence requirements. Appropriate measures must be taken such as identifying working conditions across supply chains that violate human rights and ensuring that appropriate measures are taken. This applies not only to your own company (if you have more than 3,000 employees) but also to your suppliers and their upstream suppliers across the entire supply chain. This means that many smaller companies are also affected by this law.

Learning objectives

You will learn background information and study the objectives of the Supply Chain Due Diligence Act and the resulting due diligence obligations for your company. You will find out how to carry out an appropriate risk analysis in your company and how to set up target group-oriented communication. You will learn the various key steps in your due diligence process and how to structure an effective complaints management process. You will become familiar with terms such as stakeholder, human rights representative, and the declaration of principles required by BAFA.
