

6194 Current REACH requirements

Objective

You know the current roles, deadlines and differences of the Candidate List, Annex XIV and XVII, and know which substances have been added to the Candidate List. You know the background and objectives of the ECHA SCIP database, can recognize how it affects you and know what planned information is to be posted. In addition, you can use the IMDS to detect REACH-relevant substances, and you can check incoming and own material data sheets as well as use the IMDS to perform a SCIP notification.

Training content

- Introduction
 - Self-classification of one's own company: roles
 - Substances, preparations and products
 - Difference between the candidate list, Annex XIV and XVII
- Current candidates list
 - Which SVHCs have been added to the candidate list (January/June 2023)
 - Perfluoroheptanoic acid and its salts (PFAS)
- Current status of the ECHA SCIP database
 - Objectives of the SCIP database
 - EU Waste Framework Directive as legal basis
 - What information should be shared?
 - Determining how affected your own company is
- Using IMDS for REACH purposes
 - IMDS material data sheet as an information basis for the material composition
 - SVHC in IMDS
 - Review of own and incoming MDSs for SVHC
 - SCIP notification with IMDS
