

6140 Using IMDS-a2 efficiently

Learning objectives

You know the areas of application and the functional scope of the IMDS-a2. You can assess the benefits of the IMDS-a2 for your daily work. You are able to install the IMDS-a2 and set up your individual working environment. You know how to use the SCIP interface introduced with Release 13 in batch mode to submit an unlimited number of MDS to SCIP. You can create and check material data sheets manually. You also know how to compare two material data sheets or modules using the provided MDS comparison function and can interpret the results. You can use the MDS request function and are familiar with the respective dashboard which provides convenient support for organizing and managing MDS requests, as well as the a2 report manager which has additional reporting options.

Course content

- ☐ Field of application and scope of functions
- ☐ Installation and setup of your individual working environment
- ☐ Creation of a material data sheet
 - Multiple search windows, drag & drop, etc.
