

6145 IMDS-a2 in a nutshell

Learning objectives

You are aware of the possible uses and functions of IMDS-a2, also taking into account the new IMDS release changes. You will be able to assess the usefulness of IMDS-a2 for your work. You understand how IMDS-a2 simplifies the creation of material data sheets and how you can easily check MDS with the a2-Examiner. You know the basic functionality for the practical comparison of two material data sheets or modules, which makes it easier for you to find changes that have been made.

Furthermore, you are familiar with the additional reporting functions, the optional REACH module as well as the MDB request and its dashboard. You also know how to use the import function to create material data sheets automatically and efficiently in the IMDS.

Course content

- ☐ Simplified MDS creation
- ☐ Checking MDS using a2-Examiner
- ☐ Comparing MDS
- ☐ Automating the In Box
- ☐ Reporting Functionalities
- ☐ Optional REACH Module
- ☐ MDS Request and Dashboard
- ☐ Automatic Creation of MDS (CSV Import)

By defining a2 check routines, you can reduce manual efforts considerably and make sure your quality assurance is up to all standards.

Format

Presentation with demonstrations and discussion

Participants

You need specific information on the applications and functions of IMDS-a2

Prerequisites

Basic knowledge in the use of PC and the internet as well as basic IMDS skills.

Duration

120 minutes

Max. number of participants: 14

Certificate

As a participant in our authorized IMDS training courses, you will receive a personal certificate proving your IMDS qualification.

Course materials

You will receive a personal copy of the in-class presentation.

Public training courses
