

6120 IMDS in practice - Master the basics and start your journey to success

Objective

You will become proficient in the practical use of the IMDS and be able to independently process material data sheets (MDSs). You will also be able to register your company in the IMDS and know how to comply with its terms of use. You will become familiar with the definitions and use of the IMDS and know how to apply its basic functions. You will also be able to create, send, and manage material data sheets (MDSs), as well as create structure trees. You will learn effective search mechanisms for finding high-quality data sheets and know how to integrate them into your structure tree. You will understand change management requirements and know how to implement them confidently. You will be able to perform simple administrative tasks in the IMDS. In addition, you will know how to avoid formal rejections by re-searching and applying OEM acceptance criteria.
