

## 6180 SVHCs and the SCIP database: recognizing and understanding reporting obligations

*To support the implementation of the EU Circular Economy Action Plan, the SCIP database was introduced by the ECHA to align with the obligations set out in the Waste Framework Directive 2008/98/EC. SCIP stands for Substances of Concern In articles as such or in complex objects (Products).*

*Since 5 January 2021, companies that place articles containing SVHCs (Substances of Very High Concern), which are on the REACH Candidate List, on the EU market have been obliged to submit information on these articles to the ECHA in the form of an SCIP dossier.*

*We will provide you with comprehensive information on the legal regulations and laws that govern your reporting obligations to the ECHA, including the sanctions that may be imposed in the event of non-compliance.*

### Objectives

To understand the EU Action Plan milestones, gain an overview of the requirements of the SCIP database, and understand who is affected by the reporting ECHA obligations. In addition, you will become familiar with data submission procedures, and understand how to prepare the SCIP notification so that you can plan your own data preparation schedule.

When processing SCIP dossiers, you will understand the required terms and the meaning of mandatory and optional fields. You will also know how to transfer the SCIP dossier (manually or automatically, S2S key). This serves as a basis for learning how to implement this in practice in the next step (see course 6181).

You will also be informed about potential sanctions for non-compliance with SCIP reporting obligations, along with guidance on how to avoid any possible fines.

### Content:

- ☐ SCIP Database
  - Objectives
  - Relevant legal regulations and laws
  - National Implementation of WFD
  - SVHCs
  - Timeline
  - Who is obliged to notify?
  - Key terms
  - Scope
  - Overview
  - Tools
  - Options for data submission
  - System to System S2S
  - Key Information
  - Data protection
  - Notification Process
  - Work Breakdown
  - Known IT Solutions

### Teaching method:

Lecture with demonstration, and discussion.

### Participants

This seminar is aimed at anyone who would like to obtain basic information about their obligations when notifying articles containing SVHCs in the SCIP database. This includes future materials compliance officers and materials compliance coordinators, who have primarily worked in areas such as product development, the environment, sustainability, quality management, or similar.

### Participation requirements

To ensure a better and deeper understanding, knowledge of REACH is an advantage; e.g. gained from our 6150 or 615r courses.

### Training duration

120 minutes

### Max. number of participants: 14

### Handout

You will receive a personal copy of the in-class presentation.

### Further training courses

Current prices and dates can be found on our website [www.imds-professional.com](http://www.imds-professional.com).

### Exclusive training

You can also book this training course to be delivered exclusively to you and your team. Benefits: You determine the date, and we adapt the content to suit your preferences and requirements.
