

6131 – Using Chemistry Manager efficiently

The Chemistry Manager provides an approach to information exchange in IMDS. This enables faster provision of all information covered by the REACH, Biocidal Products, and EUDR regulations. In this training course, you will learn what the Chemistry Manager does and how to use it in a targeted and efficient manner.

Objective

In this training course, we will familiarize you with the new information philosophy and the use of the Chemistry Manager. You will learn about the essential requirements and obligations of the Chemistry Manager and the currently valid REACH, Biocidal Products, and EUDR regulations. After completing the training, you will know how to work efficiently with the Chemistry Manager.

Content

- ☐ Background and current developments
 - Background and aims in the supply chain
 - Development and release trends in IMDS
- ☐ Overview of underlying regulations
 - REACH
 - Biocides
 - EUDR
- ☐ General functionality of the Chemistry Manager
 - The mechanism of information transfer
 - Personal settings, access request
 - Administration, authorization profile
 - Symbolism within the Chemistry Manager
- ☐ The Regulation Wizard
 - General regulatory information
 - Creating a regulation request
 - Regulation request process and status labeling
- ☐ Sharing BPR information in the supply chain
 - BPR information at the material level
- ☐ Sharing REACH information in the supply chain
 - REACH Annex XIV information at the material level
 - REACH information at the component level
- ☐ Sharing EUDR information in the supply chain
 - EUDR information at the material and component level
- ☐ Dynamic SVHC in the Chemistry Manager
 - medium-chain chlorinated paraffins (MCCPs)
- ☐ Conclusion – Your questions

Teaching method

Lecture with demonstrations and exercises, questions and answers

Target audience

Managers and users from the areas of IMDS, quality management, design, materials laboratory, and environmental management.

Prerequisites

You are already familiar with all standard IMDS functions.

Duration

180 minutes = 3 hours

Max. number of participants: 14

Personal practice license

In our seminars, you will work on the special IMDS training system from DXC Technology. In addition, we will provide you with a free ID for a personal practice license for 4 weeks after the seminar.

Documents

You will receive a personal copy of the presentation accompanying the course. Further information about IMDS can be found at www.imds-professional.com.

Public training

Current prices and dates can be found on our website www.imds-professional.com.

Exclusive training

You can also book this training exclusively, in which case we charge a daily fee. Your advantage: You determine the date and number of participants. On request, we can take care of the entire organization.
