6115 Automating MDS requests

The MDS request function is a very powerful feature. Before using it, you should agree on its use with your supplier and define rules to communicate your requirements.

Objective

You know all relevant features for requesting material data sheets from your suppliers using the IMDS system. You can evaluate this request mechanism and use it safely within your company. You are able to answer your customers' enquiries, link them to existing MDSs or reject them if necessary.

Content

- ❒ Overview of the MDS request functions
  - − Personal settings

- ❒ Received MDS requests
  - − Processing MDS requests
  - − Assigning MDS requests
  - − Rejecting MDS requests

- ❒ Own MDS requests
  - − Creating your own MDS requests
