

6193 IMDS - How to select the right application codes

Objective

The requirements for compliance with legal guidelines and regulations as well as specifications of the automotive industry are increasing. The new ELV Regulation has been finalized in draft form and will be introduced in the EU. Find out in advance about the current status and the changes that will affect the application codes in IMDS.

In this context, you will learn what tasks you will be responsible for and what functions application codes perform. You will learn where to find application codes and how to check them. You will be able to determine the correct application code and set it in the system to prevent rejection reasons in advance. In this way, you guarantee compliance with the legal directive (ELV) and thus meet the requirements of the automotive industry.

Content

- ELV 2000/53/EC and ELV-R 2005/64/EC
