iPCA Refresher

For anyone who wants to refresh their iPCA knowledge and ensure they can use the applications provided in iPCA effectively and efficiently.

>> OBJECTIVE

Discover how to create an MDS using the BOM import feature, review your process, and verify the generated MDS.

Ensure that the SPM application is deployed for an efficient supply chain process. Configure the parameters in the iPCA incoming inspection to best suit your workflow and learn how AIC and to-do lists can help you optimize your workflow.

Plan the setup of an analysis job and learn how to confidently establish this procedure and the associated processes within your company. Verify that the powerful CSI inspector and its wizard are optimally configured for you to plan and execute rule-based inspection runs in your account.

Your benefit: This training session will bring you up to speed and familiarize you with all the features that have changed since your last training session.

>> TOPICS COVERED
