iPCA — Inbox Check for Quality Manager

Legal guidelines, regulations, IMDS rules, as well as your own and customer-specific requirements set high demands on the control and acceptance of incoming MDSs. In addition, compliance with the requirements plays a major role in the creation of high-quality MDSs for your customers.

>> OBJECTIVE

You are familiar with the internal procedures and processes of the automated Inbox Check function in the iPCA system. You are aware of all the parameters in the Inbox Check area and can use them with confidence. You can use the search function in the iPCA with confidence and can define the correct search criteria for your search and interpret them correctly. You will learn how the AIC function in iPCA can automatically reject and evaluate MDSs according to predefined test routines. You will also know how to create and process defined to-do lists. You will be able to modify rejection reasons retrospectively and manually and can decide whether to accept or reject MDSs in iPCA.

Your benefit: After this training, you will have a detailed knowledge of the configuration options for the Inbox Check and how to configure them in the iPCA system. This will enable you to improve the quality of your MDS data and prevent MDS rejections in advance.

>> TOPICS COVERED

Introduction and contents

Process
(Changes only on the following day, checking on receipt, etc.)

Configuration of the checks
- General checks
- Recommendation checks
- Application checks
- Check for complex rules (CSI)
- Check of recipient-specific data

Inbox check parameters
- General overview of the various parameters
