

Material Compliance (MC) is a cross-company responsibility. Missing processes, inadequate documentation, or insufficient proof of compliance can result in substantial fines, criminal prosecution, product recalls, and significant reputational risks.

>> OBJECTIVE

This seminar provides an overview of the legal fundamentals, liability risks, and consequences of non-compliance, and demonstrates how risks for company management and the organization can be systematically minimized.

Participants will gain an understanding of the legal framework for Material Compliance (MC), be able to assess compliance structures, implement control mechanisms, and evaluate the consequences of breaches of duty.

Your Advantage: Experts with many years of industry experience in the fields of materials and product compliance share their expertise with you.

>> NOTICE

This training is part of the certificate program “Material Compliance Manager” (PersCert TÜV).

Further information is available at www.imds-professional.com

>> TOPICS COVERED

Introduction and Legal Context
