Using the IMDS Regulation Wizard efficiently

The Regulatory Wizard provides a structured approach for exchanging information in IMDS. It enables faster provision of all information required under the REACH and Biocidal Products regulations. In this training, you will learn what the Regulatory Wizard can do and how to share regulatory information within the supply chain in a targeted way and work with it efficiently.

>> OBJECTIVE

In this training, we will familiarize you with the new information approach and the use of the Regulatory Wizard. You will learn about the key requirements and obligations related to the Regulatory Wizard in the context of fulfilling REACH and biocides reporting duties. You will also understand how medium-chain chlorinated paraffins (MCCPs) are dynamically defined within the Regulatory Wizard. By the end of the training, you will know how to work efficiently with the Regulatory Wizard.

Your advantage: You will gain confidence and speed in handling regulatory requirements: after the training, you will be able to use the Regulatory Wizard effectively to provide REACH and biocides information faster, pass it on accurately, and manage it efficiently within your supply chain. This helps you save time, avoid errors, and reliably meet your reporting obligations.

>> TOPICS COVERED

Background and current developments
- Background and aims in the supply chain
- Development and release trends in IMDS

Overview of underlying regulations
- REACH
- Biocides

General functionality of the Regulation Wizard
- The mechanism of information transfer
- Personal settings, access request
- Administration, authorization profile
- Symbolism within the Regulation Wizard

The Regulation Wizard at a glance
- General regulatory information
- Creating a regulation request
- Regulation request process and status labeling

Sharing BPR information in the supply chain
- BPR information at the material level

Sharing REACH information in the supply chain
- REACH Annex XIV information at the material level
- REACH information at the component level

Dynamic SVHC in the Regulation Wizard
- medium-chain chlorinated paraffins (MCCPs)

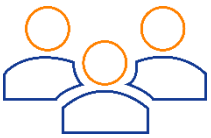
product compliance

Teaching method

Lecture with demonstrations and exercises, questions and answers

Duration

180 min. (3 hours)



Max. number of participants

14

>> TARGET GROUP

Managers and users from the areas of IMDS, quality management, design, materials laboratory, and environmental management

>> PERSONAL REQUIREMENTS

You are already familiar with all standard IMDS functions.

>> DOCUMENTATION

You will receive a copy of the presentation used in class as a PDF.

>> CERTIFICATE OF PARTICIPATION

You will receive a personal certificate of participation that you can use to demonstrate your qualification.

>> PUBLIC TRAINING

You can find current prices and dates on our website:

www.imds-professional.com

>> EXCLUSIVE TRAINING

This training course can also be booked exclusively for your organization, either as a webinar or as an in-person session.
Your advantage: You choose the location, date, and number of participants, and you can set the focus areas of the content.
